

IRONWEAVE®

Who is Ironweave® right for?

Ironweave® is right for people who are hard on their vehicles. It's built for drivers and operators who deal with dirt, grease, sharp tools, heavy gear, moisture, and constant abuse. Think construction crews, fleet drivers, heavy equipment operators, farmers, first responders, and anyone who treats their truck or machine like a tool, not a status symbol.

If your seats see mud, sweat, metal edges, dog claws, or work on a daily basis, Ironweave® is the right fabric.

Features + Specifications

- Crafted from American-made CORDURA® for proven durability
- Highly resistant to abrasion, tearing, and punctures
- Breathable and quick-drying with no foam to trap heat or moisture
- Holds up to constant entry, exit, and heavy gear
- Tested under extreme, real-world conditions
- Designed to protect seats and outlast the vehicle itself

Pros + Cons

Pros

- Extremely abrasion-resistant and tear-resistant
- Handles sharp edges, heavy friction, and rough use
- Excellent moisture resistance for spills, sweat, and wet gear
- Holds its shape under constant in-and-out use
- Long service life in demanding environments
- Ideal for fleet and commercial applications where durability matters most

Cons

- Stiffer than lighter fabrics
- Takes more effort to install due to its rugged construction
- More "work truck" than "daily driver" in look and feel
